

WESTCONTROL
ELECTRONICS

Electronic Development Engineers

Westcontrol Electronics are now recruiting electronics development engineers for their R&D team based at Ipark in Stavanger. Westcontrol delivers complete product solutions to both the consumer and industrial electronics markets and after the recent acquisition of Robertson AS in Egersund has a combined annual turnover of 180 million NOK and a staff of 125 employees.

Main duties:

- Design and development of electronic solutions
- Prototyping and testing
- Customer liason and project management
- Documentation and handover to production

Skills and Qualifications:

- Track record in electronics product development and design
- Creative and solution orientated
- Knowledge of extreme operating environments – High temp and pressure
- Worked with EMC & ATEX directives
- Willingness to work in team or independently
- A "passion" for electronics!

If you want to be involved in seeing a new product idea through to manufacture then send an application and CV today to colin@asap-personal.no
Technical contact: Ingar Bergeland - ingar@westcontrol.com
